SUPPLEMENTARY MATERIALS

Horvath A, Stróżyk AK, Szajewska H, Dziechciarz P. Infant feeding knowledge and practices among parents of infants aged 4–12 months in Poland: an online cross-sectional survey study. *Pol Ann Med.* <https://doi.org/10.29089/paom/146442>. [in press].

Appendix 2. Sociodemographic characteristics of survey participants, *n*(%).

Characteristic	<i>n</i> (%)
Total	6934
Gender	
Female	6880(99.2)
Male	54(0.8)
Age, responders	
Up to 25 y	1132(16.3)
26–30 y	3267(47.0)
31–35 y	2066(29.8)
>36 y	469(6.8)
Age, infants	
4–6 months	1695(24.4)
7–12 months	5239(75.5)
Education	
Primary	41(0.6)
Secondary	654(9.4)
Vocational	1197(17.3)
Tertiary	4995(72.0)
Answer denial	47(0.7)
Financial family status (perceived by parents)	
Enough money and some saving	3519(50.7)
Enough money, but not enough for savings	2144(30.9)
Living sparingly and, therefore, have enough money	999(14.4)
Living very sparingly to save money for more serious expenses	136(2.0)
Money only for basic needs	136(2.0)
Impact of COVID-19 pandemic on family material situation	
Change for the better	59(0.85)
Rather change for the better	135(1.95)
No change	3984(57.5)
Rather change for the worse	2012(29.0)
Change for the worse	744(10.7)
City of residence	
Village	1862(26.85)
City of 20k citizens	746(10.8)
City of 20–100k citizens	1382(19.9)
City of 100–500k citizens	1224(17.65)
City of above 500k citizens	1720(24.8)
